

# STORY OF SJHS

By; Dominique Iannaco

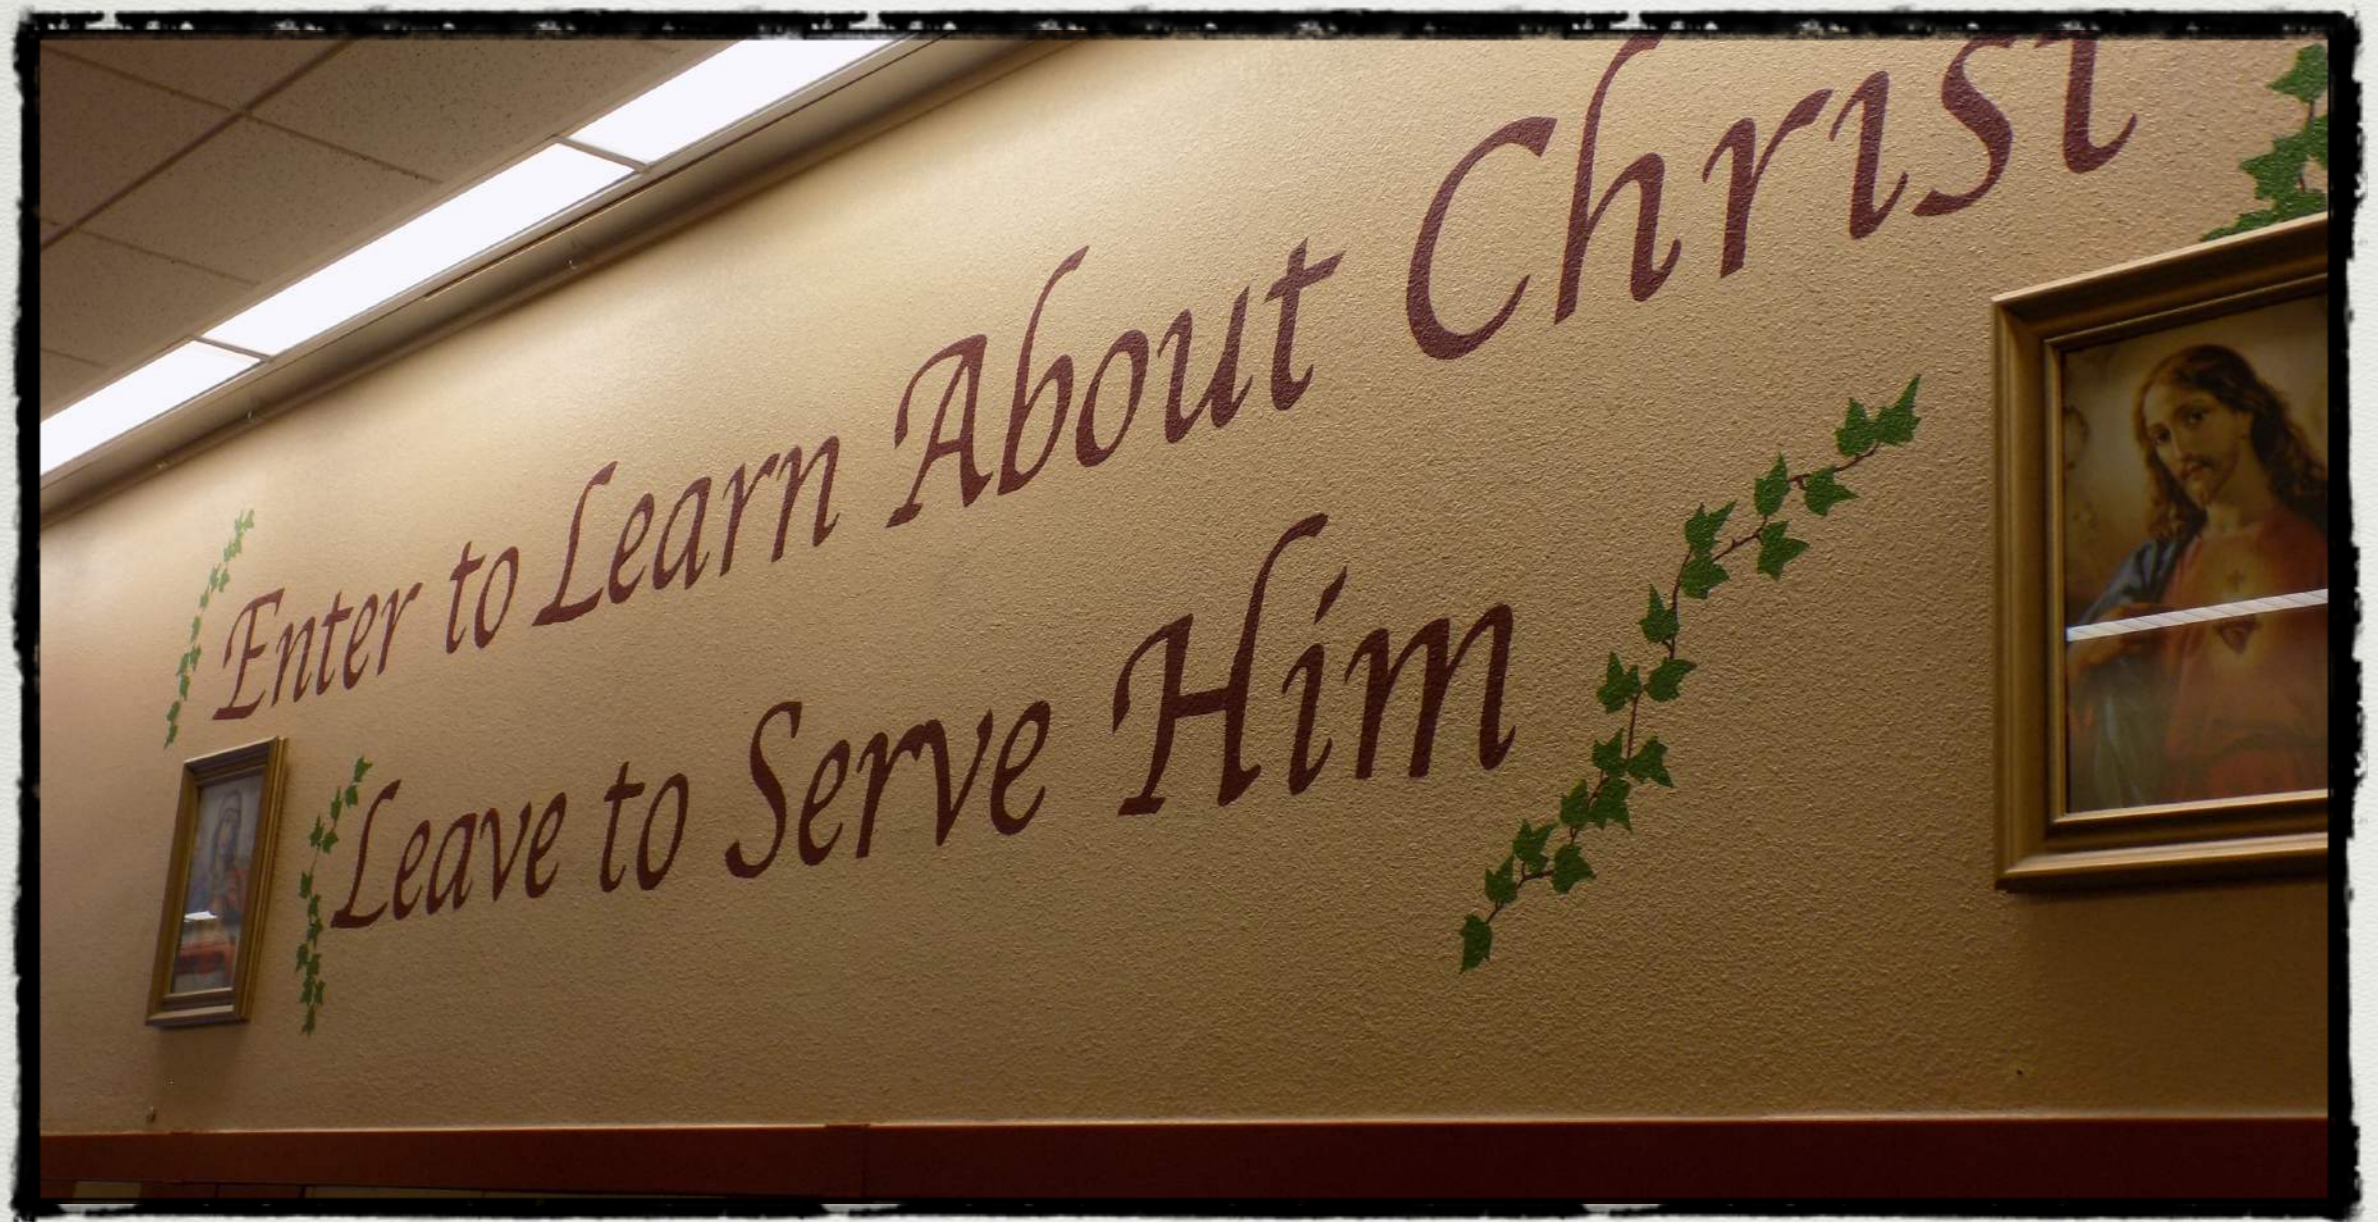

## Lockers

These lockers represent the students at SJHS. It shows that the students make up the SJHS family and each bring their own uniqueness to the school.

## Religion

SJHS focuses a lot on religion. It is one of the main focuses of SJHS as well. This quote is displayed on the wall at SJHS to remind us students what a priority it should be to listen to this quote. I took this picture to show people what one of our mottos is at SJHS.

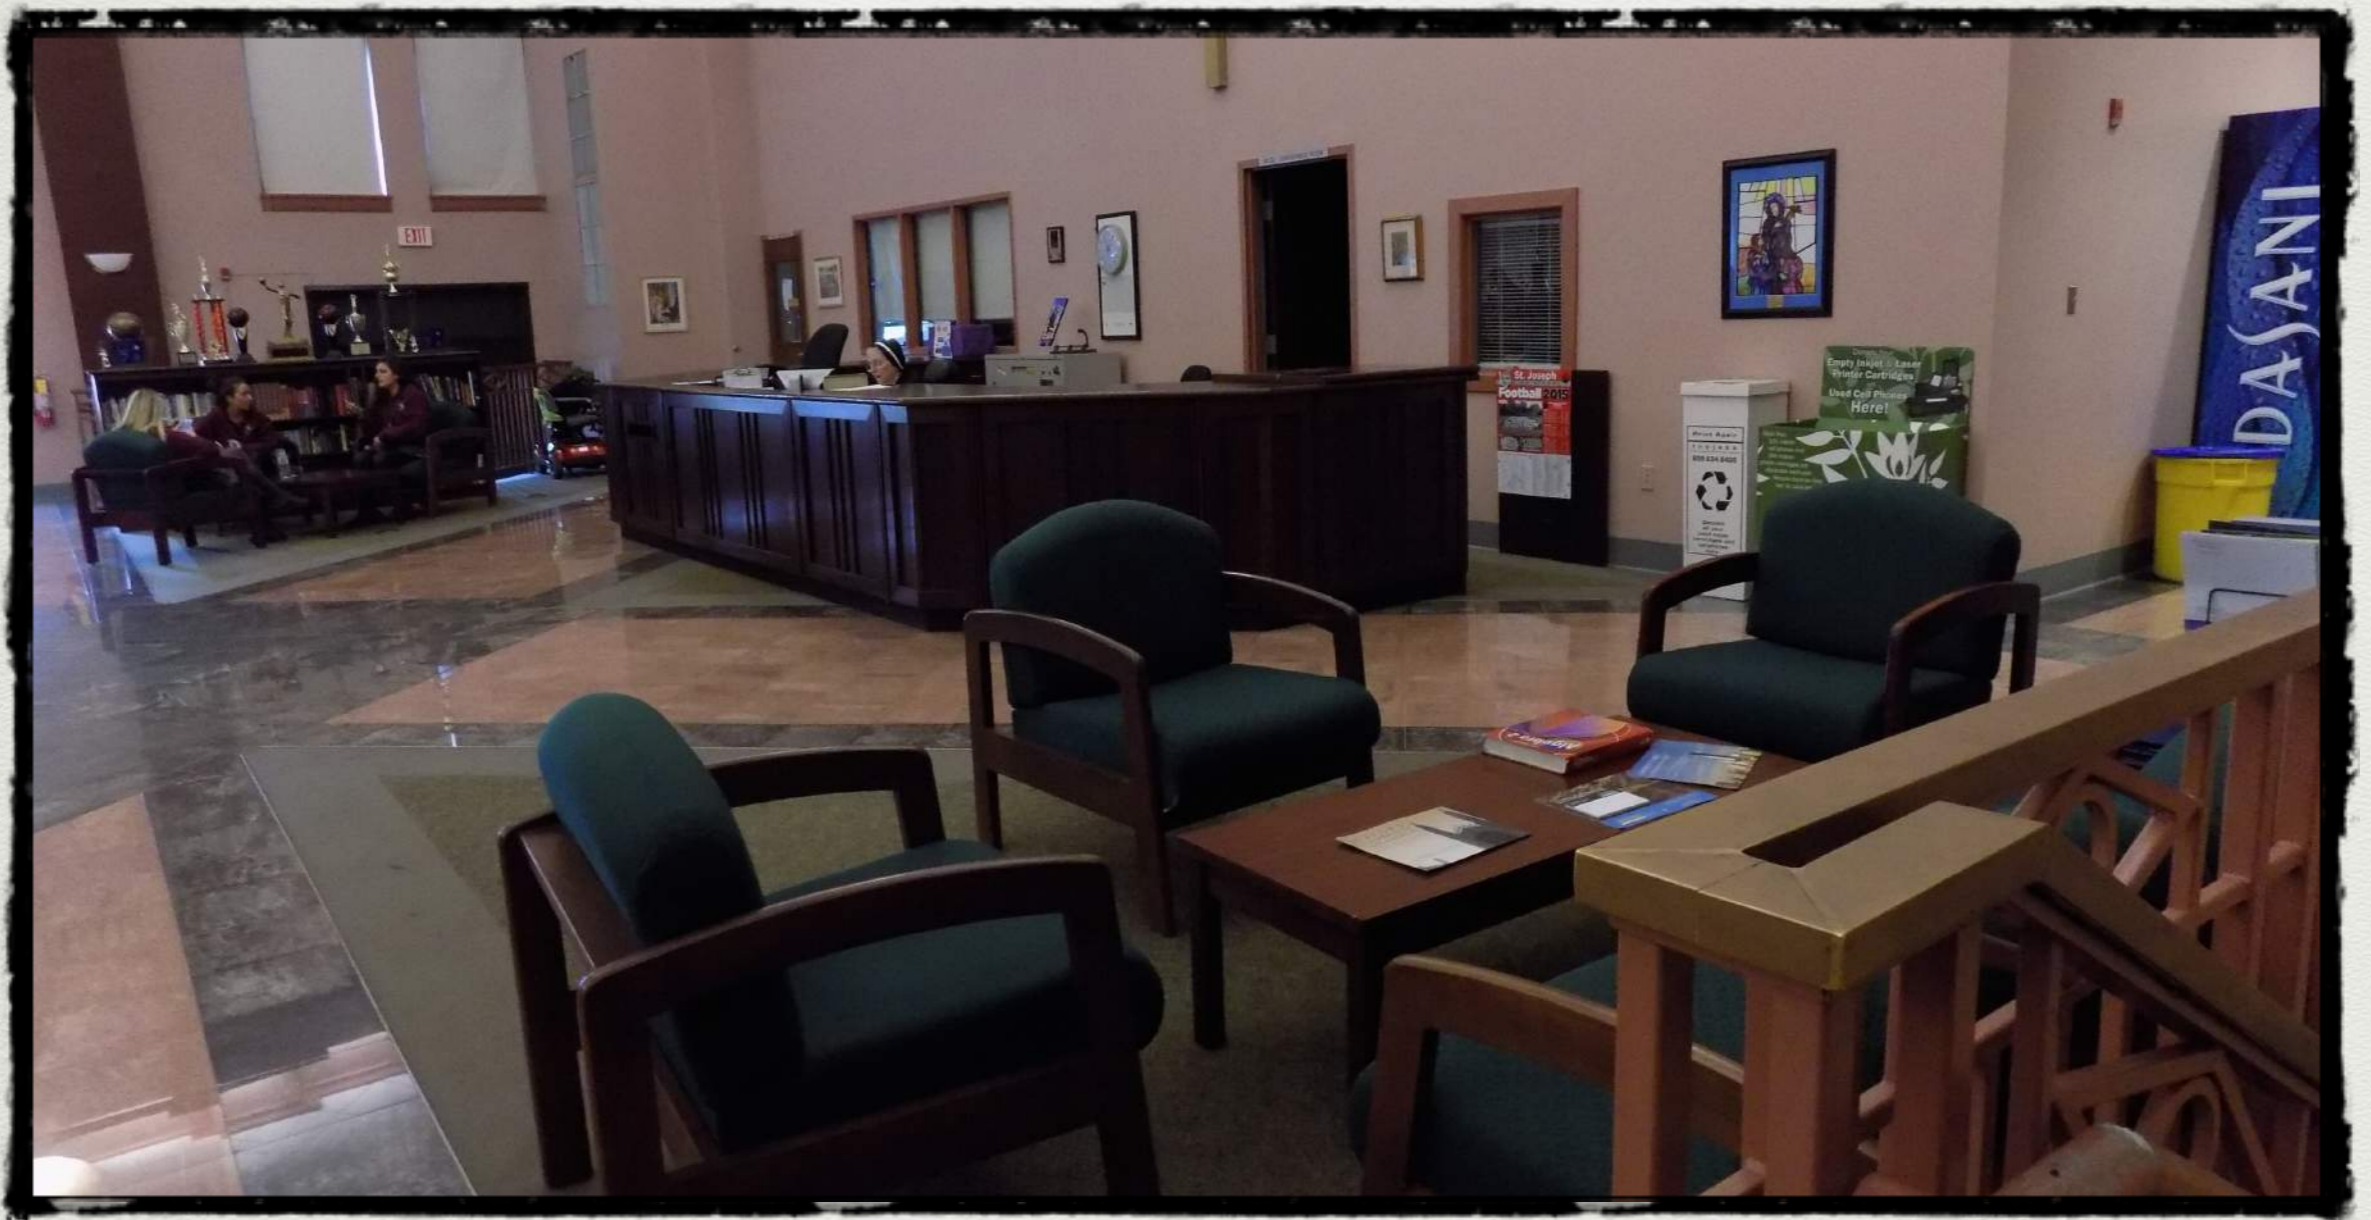

## Education

Education is a big part of SJHS. This is a picture of the school's biology lab. I took this picture to represent how important the science department is. I wanted this picture to show how hands on the students are and how many lab experiments there are at SJHS.

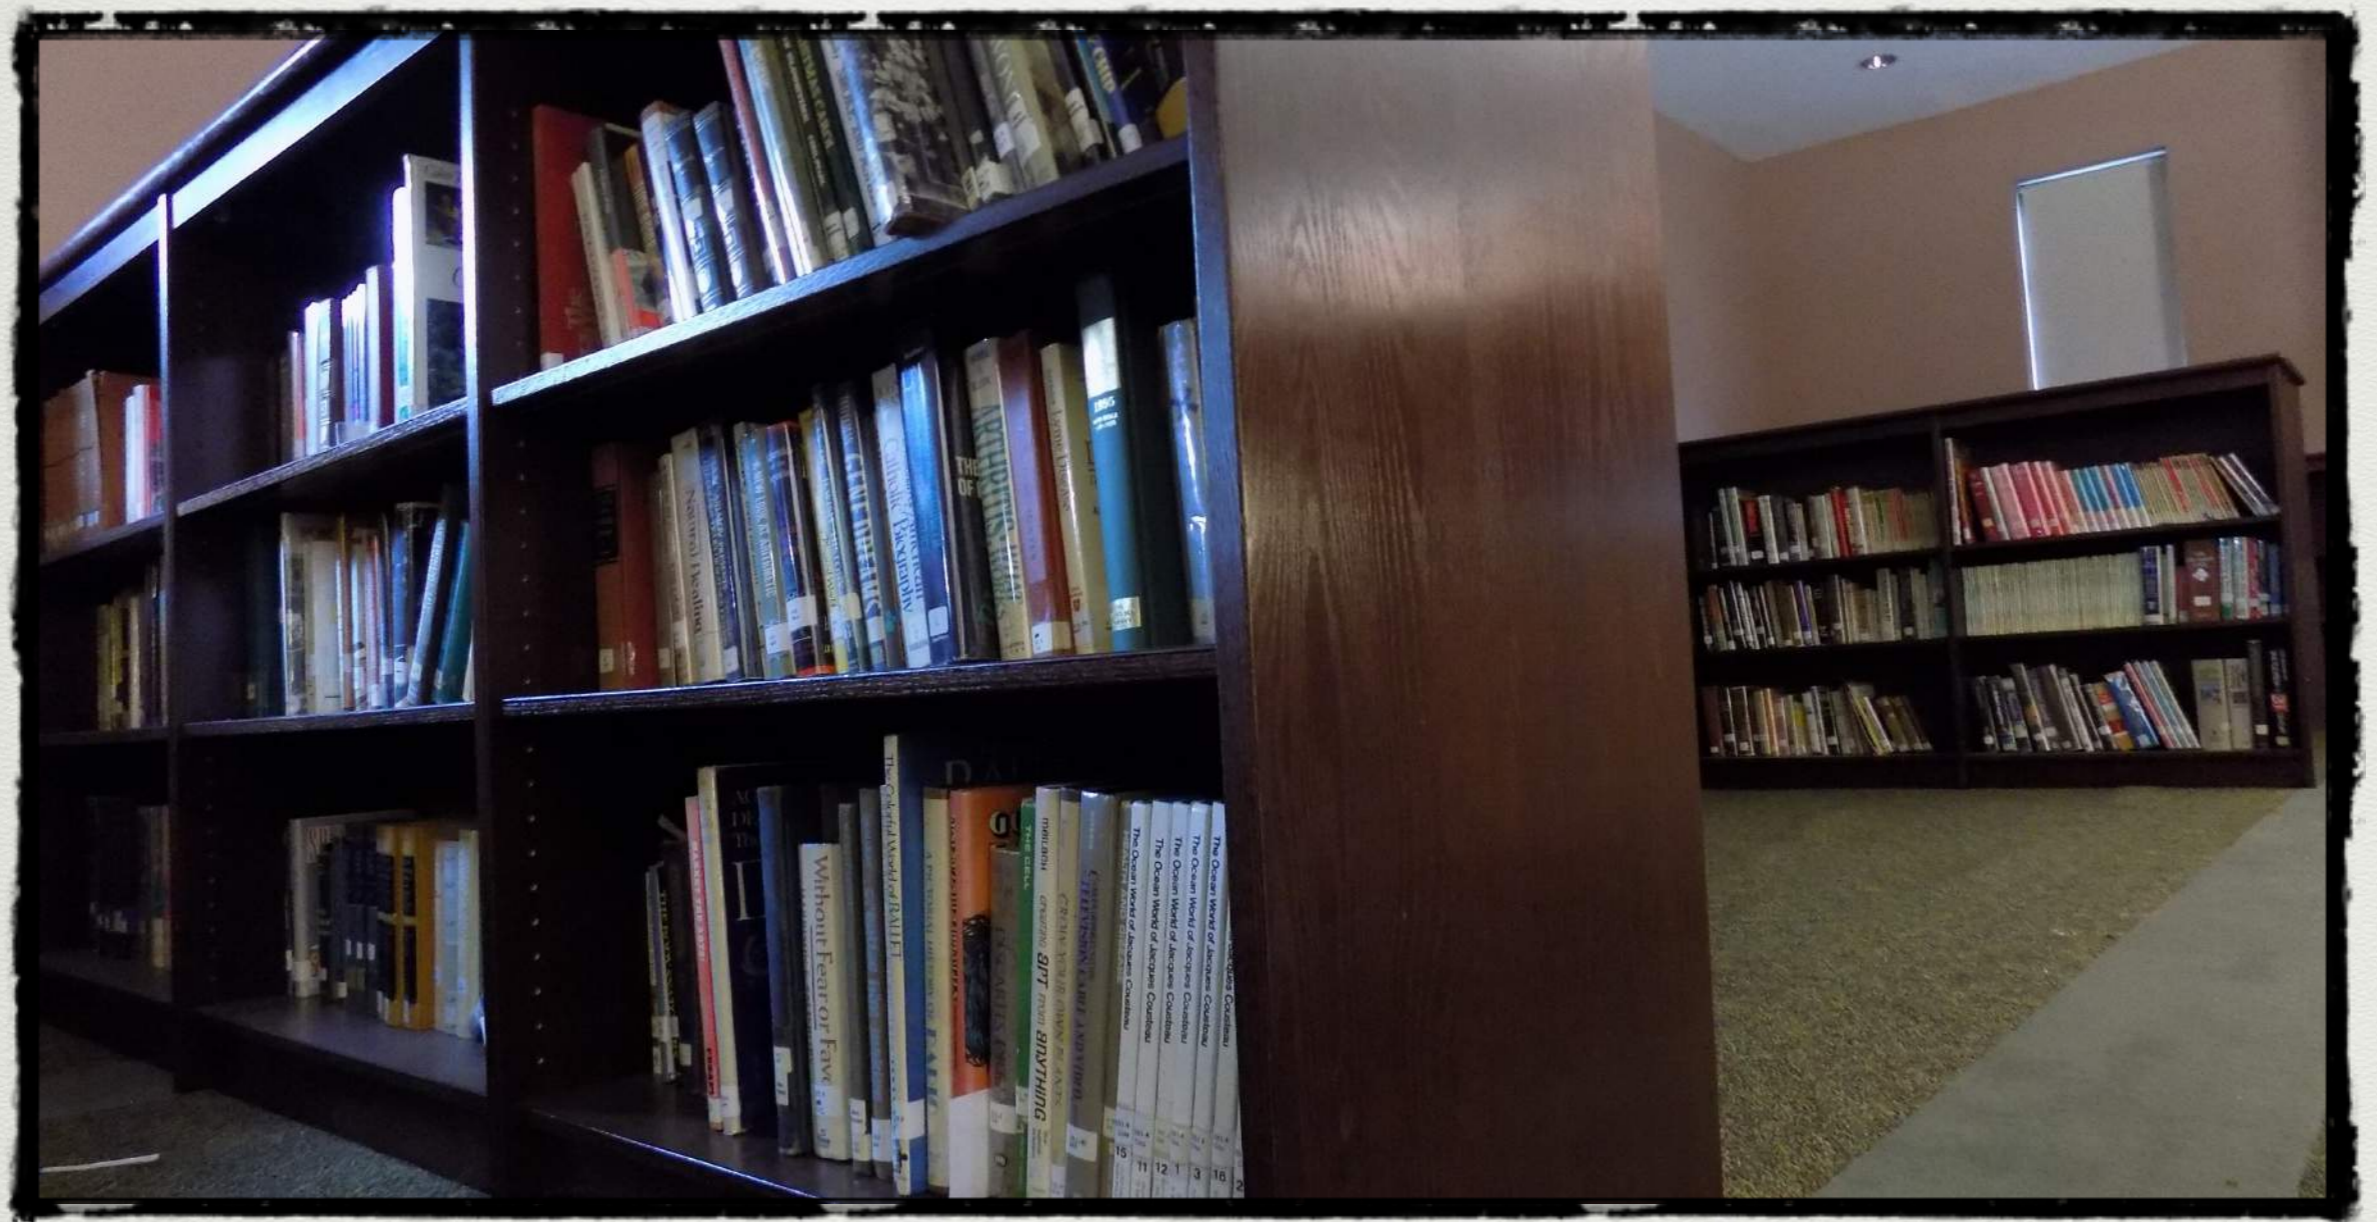

## Media Center

The media center is a big part of SJHS. It is the room where a lot of meetings are held and a place where students can go to relax and study.

The media center is the place where students or teachers can go to hangout and chat silently for a few minutes.

## Literature

Reading is a very important thing at SJHS. Reading is how we learn about different stories and learn how to write our own stories. The library at SJHS is quite small but there is a variety of books to choose from. Literature teaches us about the past and stories about Christ.

## **Location**

The location of SJHS is very important. It represents what type of school we are and what type of neighborhood it is a part of. The location obviously promotes where SJHS is located, but it also shows the type of surroundings the students are involved with.

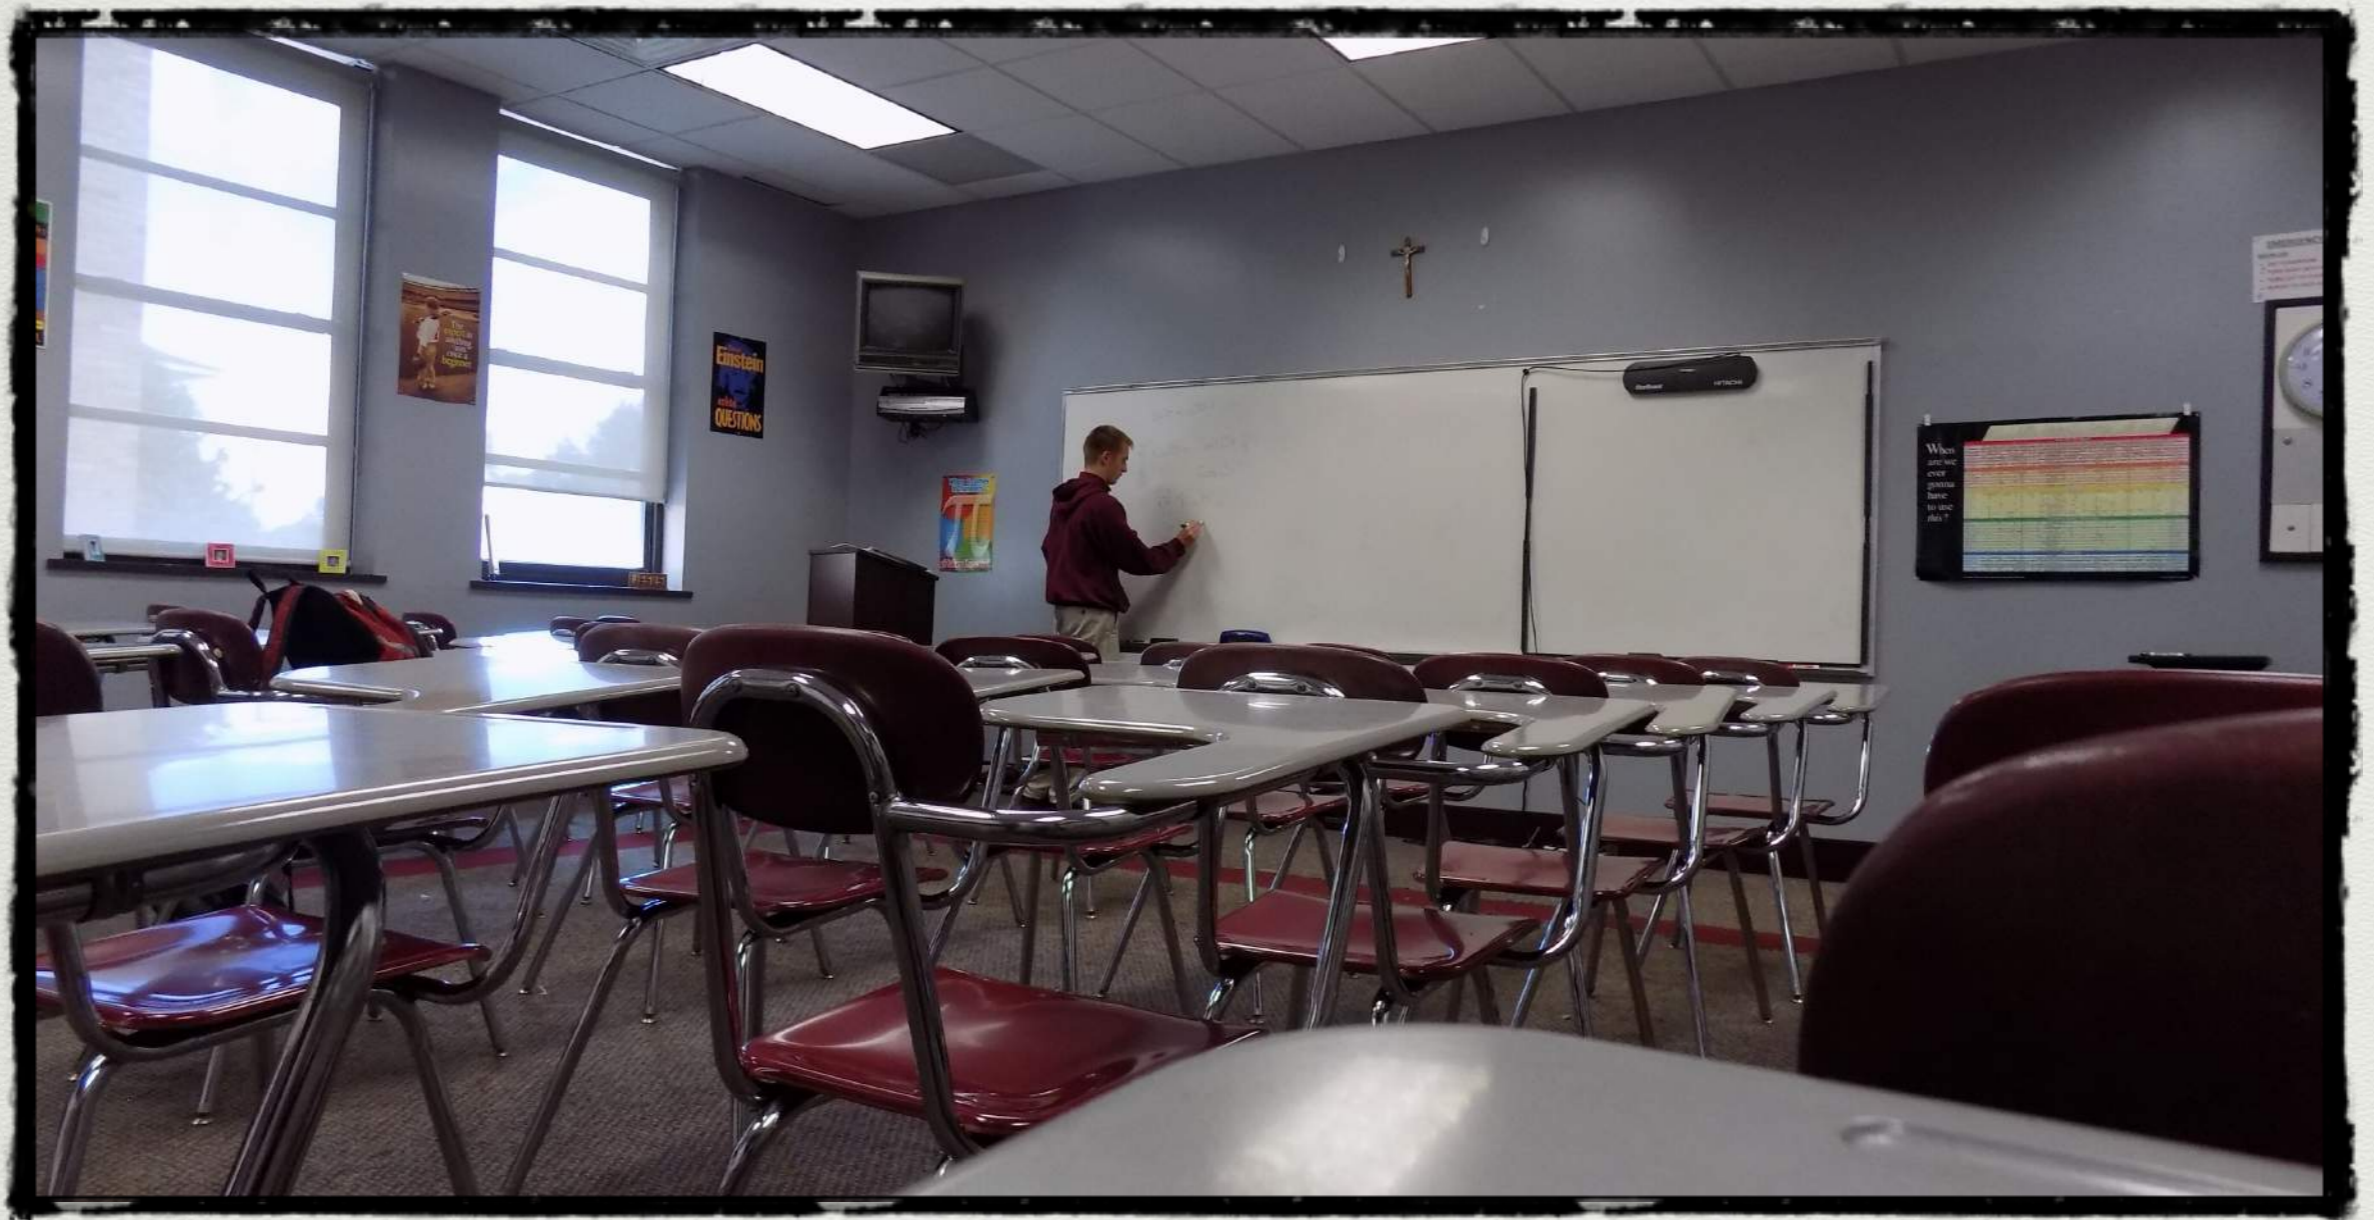

## **Red Brick Building**

The red brick building is a huge part of SJHS. It is the building where most of the religion classes are taught and where the guidance counselor's office is. The red brick building is a place where the students can go to talk about their problems and clear their minds. It is also a very important part of SJHS because it is the second building, without it SJHS wouldn't be the same.

## Classrooms

Classrooms are a huge part of SJHS. They are what makes the school a school. The classrooms are important because it is where the teaching is done in the school. The classrooms are where the students can come together to learn. It is also a place where students can go to get advice from teachers or a friend.

## Front of the School

This picture shows the outside of SJHS and some of its surroundings. This picture is important to promote SJHS because it shows what its appearance looks like. It also shows that SJHS takes care of its appearance and that we are a clean school. The front of the school is important because it is what people see the most when driving or walking by. The front of the school is displayed the most and is what gets the school recognized.

## **The building of SJHS**

The building itself is very important. It is SJHS. Without the actual building, there would be no school or no students. SJHS is the home of the wildcats. This picture promotes the school itself. It shows what the school looks like, and that is one of the most important things to display.
